Management and Organization (จุฬาลงกรณ์มหาวิทยาลัย)

Management, 15e (Robbins/Coulter) Chapter 2 Making Decisions

AACSB: Application of knowledge

Classification: Application

1) A problem can best be described as A) a change from the past B) something bad that has happened C) a difference between current conditions and some desired state D) a loss of something of value Answer: C Diff: 3 AACSB: Reflective thinking Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Concept
2) Which of the following statements is true concerning problem identification? A) Problems are generally obvious. B) A symptom and a problem are one and the same. C) Generally, what is a problem for one manager is a problem for all other managers. D) Effectively identifying problems is not easy. Answer: D Diff: 2
AACSB: Reflective thinking Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Concept
3) Sales of the high-end units have declined. The owners want Arnold, the CEO, to increas revenues to previous levels. His first action should be to A) identify previous sales levels B) determine why sales are off C) compare costs for three new models under development D) immediately begin production on the lowest cost model Answer: B

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

4) Ridership on the city's public transportation buses has fallen for three weeks in a row. This is
A) a problem B) a symptom C) neither a problem nor a symptom D) a condition, but we need more information to determine whether it is a problem or a symptom Answer: D Diff: 3 AACSB: Application of knowledge
Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Application
5) After identifying a problem, the next step in the decision-making process is A) identifying decision criteria B) allocating weights to decision criteria C) analyzing alternatives D) developing alternatives Answer: A
Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Concept
6) To determine the, a manager must determine what is relevant or important to resolving a problem. A) bounded rationality of a decision B) escalation of commitment C) cost of implementation D) decision criteria Answer: D Diff: 2
AACSB: Reflective thinking Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Concept
7) Belinda wants to introduce a new model to the product line. Three models are being developed. Belinda can choose only one. She has decided to focus on target market size, production costs, and net profits. These are Belinda's A) alternatives B) criterion weights C) decision criteria D) problems Answer: C Diff: 2
AACSB: Application of knowledge Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Application

8) Amanda, a single parent, is looking for a new job. Considering that she has two school-aged children, she is particularly keen on finding an employer who can provide her with alternative work arrangements such as flexible work hours and telecommuting. In terms of the decision-making process, these represent Amanda's A) decision criteria B) problems C) alternatives D) heuristics Answer: A Diff: 2
AACSB: Application of knowledge Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.
Classification: Application
9) Max is planning to go away to college next year and is currently trying to figure out to which colleges he should apply. He would like to major in English Literature at an accredited liberal arts college, but is also looking for a university that offers financial aid. In terms of the decision-making process, these represent Max's A) problems B) alternatives C) decision criteria D) heuristics Answer: C Diff: 2
AACSB: Application of knowledge
Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Application
 10) After identifying the decision criteria that are important or relevant to resolving a problem, the next step in the decision-making process is A) allocating weights to the criteria B) analyzing the alternatives to solving the problem C) reducing the number of criteria through the process of elimination D) implementing the alternative Answer: A Diff: 1
AACSB: Reflective thinking Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Concept

11) Bryan must select a new supplier for lighting fixtures for his company's mobile homes. He has
decided quality is more important than price but price is more important than lead times. Bryan
will use these priorities to
A) analyze alternatives
B) set his decision criteria
C) allocate weights to the criteria
D) develop alternatives
Answer: C
Diff: 3
AACSB: Application of knowledge
Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.
Classification: Application
12) Creativity is most essential in which of the following steps of the decision-making process?
A) Analyzing alternatives
B) Allocating weights to the decision criteria
C) Developing alternatives
D) Identifying decision criteria
Answer: C
Diff: 1
AACSB: Reflective thinking
Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.
Classification: Concept

13) Carla is searching the Internet for sources of Himalayan salt to make bath salts. Carla is at the _____ step in the decision making process.

A) identify-the-problem

B) identify-decision-criteria

C) allocate-weights

D) develop-alternatives

Answer: D Diff: 2

AACSB: Application of knowledge

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

- 14) When the overhead cranes crashed into each other for the third time, Joe formed a team to look into ways to avoid future crashes. After a brainstorming session, the team settled on three ideas, any of which might work. The team has completed which step in the decision-making process?
- A) Develop alternatives
- B) Analyze alternatives
- C) Select an alternative
- D) Implement an alternative

Answer: A Diff: 2

AACSB: Application of knowledge

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

Classification: Application

- 15) Carla has identified several possible sources for Himalayan salt to make her bath salts. Now she is comparing their prices, quality, and delivery times. At what step is she in the decision-making process?
- A) Develop alternatives
- B) Analyze alternatives
- C) Select an alternative
- D) Implement the alternative

Answer: B Diff: 2

AACSB: Application of knowledge

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

Classification: Application

16) Carla discovered that the supplier with the highest quality also had the longest lead time. The supplier with the best lead time had the highest price. To help Carla make her decision, she should

D) check with the Better Business Bureau for customer complaints

Answer: C Diff: 3

AACSB: Application of knowledge

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

A) order a small quantity from each supplier for comparison

B) rely on customer reviews to guide her decision

C) multiply her ratings for each criteria by the weight for the criteria then sum the scores

- 17) After Abby listened to the weather report this morning before work, she drove her car and carried an umbrella instead of riding her motorcycle. Whether she realizes it or not, Abby
- A) analyzed criteria
- B) implemented a decision
- C) assigned weights to criteria
- D) evaluated a decision

Answer: B Diff: 3

AACSB: Application of knowledge

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

Classification: Application

- 18) In the decision-making process, while _____, the decision maker puts the decision into action by conveying it to those affected by it and getting their commitment to it.
- A) selecting an alternative
- B) evaluating a decision's effectiveness
- C) implementing an alternative
- D) analyzing alternatives

Answer: C Diff: 1

AACSB: Reflective thinking

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

Classification: Concept

- 19) Which of the following is important in effectively implementing the chosen alternative in the decision-making process?
- A) Evaluating each alternative by using the established criteria.
- B) Being creative while implementing the alternatives.
- C) Allowing those impacted by the outcome to participate in the process.
- D) Ignoring criticism concerning your chosen alternative.

Answer: C Diff: 2

AACSB: Reflective thinking

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

A) develop the method of evaluating whether the decision is a good one B) notify upper management that change is coming so they won't be blindsided C) alert external stakeholders that the problem has been solved D) check to make sure the conditions that existed at the time of the decision still exist, and make sure the decision is still the best one Answer: D Diff: 3 AACSB: Reflective thinking Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Concept 21) The final step in the decision-making process is to _____. A) determine the criteria for the next decision B) analyze the process of allocating weights to the decision criteria C) evaluate the outcome of the decision D) implement the chosen alternative Answer: C Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Concept 22) Joe's team implemented one of the ideas to avoid crane crashes. It is important for the team to evaluate the results because _ A) the team was not sure their idea would work B) the team wants to impress the plant manager C) results may vary from expectations D) another crane crash could cost the team their jobs Answer: C Diff: 2 AACSB: Application of knowledge Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Application 23) The decision-making process begins by identifying decision criteria. Answer: FALSE Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.1: Describe the eight steps in the decision-making process. Classification: Concept

20) Before actually putting the decision into action, the decision-maker may find it prudent to

24) A decision criterion defines what is important or relevant to resolving a problem.

Answer: TRUE

Diff: 1

AACSB: Reflective thinking

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

Classification: Concept

25) In the decision-making process, after allocating weights to the decision criteria, the decision maker lists viable alternatives that could resolve the problem.

Answer: TRUE

Diff: 1

AACSB: Reflective thinking

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

Classification: Concept

26) Once the alternatives to solving a problem have been identified, the next step in the decision-making process is selecting one of these alternatives.

Answer: FALSE

Diff: 2

AACSB: Reflective thinking

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

Classification: Concept

27) Implementing an alternative refers to the process of choosing the best alternative.

Answer: FALSE

Diff: 2

AACSB: Reflective thinking

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

- 28) List and discuss the eight steps in the decision-making process. Answer:
- 1. Identify a problem The decision-making process begins with the existence of a problem or a discrepancy between an existing and a desired state of affairs. However, a discrepancy without pressure to take action becomes a problem that can be postponed.
- 2. Identify decision criteria Once the manager has identified a problem that needs attention, the decision criteria important to resolving the problem must be identified. That is, managers must determine what is relevant in making a decision.
- 3. Allocate weights to the criteria The decision maker must weigh the items in order to give them the correct priority in the decision. A simple approach to doing this is to give the most important criterion a weight of 10 and then assign weights to the rest against that standard.
- 4. Develop alternatives The fourth step requires the decision maker to list the viable alternatives that could resolve the problem. No attempt is made in this step to evaluate the alternatives, only to list them.
- 5. Analyze alternatives Once the alternatives have been identified, the decision maker must critically analyze each one. From this comparison, the strengths and weaknesses of each alternative become evident.
- 6. Select an alternative The sixth step involves choosing the best alternative from among those considered.
- 7. Implement the alternative Implementation involves conveying the decision to those affected by it and getting their commitment to it. If the people who must carry out a decision participate in the process, they are more likely to enthusiastically support the outcome than if they are just told what to do.
- 8. Evaluate decision effectiveness The last step in the decision-making process involves appraising the outcome of the decision to see if the problem has been resolved. If the desired result has not been achieved, the manager may consider returning to a previous step or may even consider starting the whole decision process over.

Diff: 3

AACSB: Reflective thinking; Written and oral communication

Learning Obj: LO 2.1: Describe the eight steps in the decision-making process.

Classification: Concept

- 29) Managers are assumed to use _____ if they make logical and consistent choices to maximize value.
- A) rational decision making
- B) intuitive decision making
- C) bounded rationality

D) evidence-based management

Answer: A Diff: 1

AACSB: Reflective thinking

Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions.

30) Dylan must choose among four candidates to fill his open accounting clerk position. If Dylan uses rational decision making, he will
A) disregard the fact the one of the candidates is the owner's nephew
B) rely on his initial impressions of the candidates to make this decision
C) base his decision on his extensive experience and accumulated judgment
D) involve others in the interviewing process
Answer: A
Diff: 3
AACSB: Reflective thinking
Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions.
Classification: Concept
31) It is assumed that a rational decision maker
A) faces unclear and ambiguous problems
B) is unlimited by his or her ability to process information
C) is unaware of all the possible alternatives and consequences
D) is fully objective and logical Answer: D
Diff: 2
AACSB: Reflective thinking
Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions.
Classification: Concept
32) When managers make decisions that are rational but limited by their ability to process the
information, they are following the concept of
A) cognitive decision making
B) bounded rationality C) escalation of commitment
D) intuitive decision making
Answer: B
Diff: 1
AACSB: Reflective thinking
Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions.
Classification: Concept
33) Evelyn's Internet search for information about "vendor for machine screws" yielded more than
100,000 items. Evelyn did not have time or resources to pursue each of these so she limited her
search to only vendors in her state. By doing this, Evelyn used
A) perfect rationality
B) bounded rationality
C) satisficing D) intuition
Answer: B
Diff: 2
AACSB: Application of knowledge
Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions.
Classification: Application

rather than A) maximize; satisfice B) neutralize; satisfice C) satisfice; neutralize D) satisfice; meximize Answer: D Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions. Classification: Concept 35) results in a solution that is considered "good enough." A) Escalating B) Linear thinking C) Intuition D) Satisficing Answer: D Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions. Classification: Concept 36) Gilda has an idea that would streamline operations, reduce costs, and increase profits. Her idea requires the cooperation of several departments, some of which have demonstrated a resistance to change. By considering the context in which the changes must happen and the people in her organization, Gilda is using A) evidence-based management B) bounded rationality C) intuition D) positive employee relations Answer: A Diff: 2 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions.	24) Managara and a sanital and
A) maximize; satisfice B) neutralize; satisfice C) satisfice; neutralize D) satisfice; maximize Answer: D Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions. Classification: Concept 35) results in a solution that is considered "good enough." A) Escalating B) Linear thinking C) Intuition D) Satisficing Answer: D Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions. Classification: Concept 36) Gilda has an idea that would streamline operations, reduce costs, and increase profits. Her idea requires the cooperation of several departments, some of which have demonstrated a resistance to change. By considering the context in which the changes must happen and the people in her organization, Gilda is using A) evidence-based management B) bounded rationality C) intuition D) positive employee relations Answer: A Diff: 2 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions.	34) Managers cannot possibly analyze all information on all alternatives; they tend to,
B) neutralize; satisfice C) satisfice; neutralize D) satisfice; maximize Answer: D Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions. Classification: Concept 35) results in a solution that is considered "good enough." A) Escalating B) Linear thinking C) Intuition D) Satisficing Answer: D Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions. Classification: Concept 36) Gilda has an idea that would streamline operations, reduce costs, and increase profits. Her idea requires the cooperation of several departments, some of which have demonstrated a resistance to change. By considering the context in which the changes must happen and the people in her organization, Gilda is using A) evidence-based management B) bounded rationality C) intuition D) positive employee relations Answer: A Diff: 2 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions.	
C) satisfice; neutralize D) satisfice; maximize Answer: D Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions. Classification: Concept 35) results in a solution that is considered "good enough." A) Escalating B) Linear thinking C) Intuition D) Satisficing Answer: D Diff: 1 AACSB: Reflective thinking Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions. Classification: Concept 36) Gilda has an idea that would streamline operations, reduce costs, and increase profits. Answer: FALSE

Diff: 2

AACSB: Reflective thinking

Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions.

54) Briefly, discuss the assumptions of rationality and the validity of those assumptions.

Answer: A decision maker who is perfectly rational is fully objective and logical. The problem faced is clear and unambiguous. The decision maker has a clear and specific goal. He is aware of all possible alternatives and consequences. Making decisions consistently leads to selecting the alternative that maximizes the likelihood of achieving that goal.

These assumptions apply to any decision-personal or managerial. For managerial decision making, an additional assumption is that decisions are made in the best interests of the organization. However, most of these assumptions of rationality are not very realistic.

AACSB: Reflective thinking; Written and oral communication

Learning Obj: LO 2.2: Explain the five approaches managers can use when making decisions.

Classification: Concept

55) What is meant by bounded rationality and satisficing?

Answer: Despite the unrealistic assumptions of perfect rationality, managers are expected to be rational when making decisions. It is understood that "good" decision makers are supposed to do certain things and exhibit good decision-making behaviors as they identify problems, consider alternatives, gather information, and act decisively but prudently. When they do so, they show others that they are competent and that their decisions are the result of intelligent deliberation. However, a more realistic approach to describing how managers make decisions is the concept of "bounded rationality." According to this concept, managers make decisions rationally, but are limited by their ability to process information.

Because they cannot possibly analyze all information on all alternatives, managers "satisfice," rather than maximize. That is, they accept solutions that are "good enough." Thus, they become rational within the limits of their ability to process information.

57) What is intuitive decision making? How does intuition affect the process of making a decision? Answer: Intuitive decision making is the process of making decisions on the basis of experience, feelings, and accumulated judgment. Intuitive decision making can complement both rational and bounded rational decision making. A manager who has had experience with a similar type of problem or situation often acts quickly with limited information because of that past experience. Managers who experienced intense feelings and emotions when making decisions actually achieved higher decision-making performance, especially when they understood their feelings as they were making decisions.

AACSB: Reflective thinking

Learning Obj: LO 2.3: Classify decisions and decision-making styles.

91) Discuss structured problems, programmed decisions, unstructured problems, and nonprogrammed decisions.

Answer: Some problems are straightforward. The decision maker's goal is clear, the problem is familiar, and information about the problem is easily defined and complete. Hence, these are called structured problems. For instance, when a server spills a drink on a customer's coat the customer is upset and the manager needs to do something. Because it is not an unusual occurrence, there is some standardized routine for handling it. For example, the manager offers to have the coat cleaned at the restaurant's expense. This is called a programmed decision, a repetitive decision that can be handled by a routine approach. Because the problem is structured, the manager does not have to go to the trouble and expense of going through an involved decision process. Not all the problems managers face can be solved using programmed decisions. Many organizational situations involve unstructured problems, which are problems that are new or unusual and for which information is ambiguous or incomplete. Whether to build a new manufacturing facility in China is an example of an unstructured problem. When problems are unstructured, managers rely on nonprogrammed decision making in order to develop unique solutions. Nonprogrammed decisions are unique and nonrecurring and involve custom-made solutions. Lower-level managers mostly rely on programmed decisions because they confront familiar and repetitive problems. As managers move up the organizational hierarchy, the problems they confront become more unstructured. However, few managerial decisions in the real world are either fully programmed or nonprogrammed. Most fall somewhere in between.

Learning Obj: LO 2.3: Classify decisions and decision-making styles.

Classification: Concept

92) Discuss the three types of programmed decisions that a manager depends on to resolve structured problems.

Answer: Usually a manager relies on one of three types of programmed decisions to counter structured problems: procedure, rule, or policy.

A procedure is a series of sequential steps a manager uses to respond to a structured problem. Identifying the problem is a bit difficult. Once it is clear, so is the procedure. For instance, a purchasing manager receives a request from a warehouse manager for 15 PDA handhelds for the inventory clerks. The purchasing manager knows how to make this decision by following the established purchasing procedure.

A rule is an explicit statement that tells a manager what can or cannot be done. Rules are frequently used because they are simple to follow and ensure consistency. For example, rules about lateness and absenteeism permit supervisors to make disciplinary decisions rapidly and fairly.

The third type of programmed decisions is a policy, which is a guideline for making a decision. In contrast to a rule, a policy establishes general parameters for the decision maker rather than specifically stating what should or should not be done. Policies typically contain an ambiguous term that leaves interpretation up to the decision maker.

Classification: Concept

93) Discuss the three different decision-making conditions that managers usually face.

Answer: When making decisions, managers usually face three different conditions: certainty, risk, and uncertainty.

- a. Certainty The ideal situation for making decisions is one of certainty, which is a situation where a manager can make accurate decisions because the outcome of every alternative is known.
- b. Risk These are conditions in which the decision maker is able to estimate the likelihood of certain outcomes. Under risk, managers have historical data from past personal experiences or secondary information that lets them assign probabilities to different alternatives.
- c. Uncertainty This is a situation in which a decision maker has neither certainty nor reasonable probability estimates available. Under these conditions, the choice of alternative is influenced by the limited amount of available information and by the psychological orientation of the decision maker.

Learning Obj: LO	2.4: Describe how biases affect decision making.

108) The last time the Whigs took over Congress, stock prices rose dramatically and unemployment fell to record lows. Once again, the Whigs are in power, so Jason expects his stock portfolio to grow significantly. Jason's thinking may be influenced by the A) representation bias B) selective perception bias C) randomness bias D) anchoring effect Answer: A Diff: 3 AACSB: Application of knowledge Learning Obj: LO 2.4: Describe how biases affect decision making.
Classification: Application
109) The last time he flew Jet Value Air, Juan's plane developed a fuel leak and had to make an emergency landing. The time before that, his plane was grounded because of an electrical problem. Juan is sure his current trip will be fraught with problems and he will once again be delayed. This is an example of the bias. A) confirmation B) selective perception C) availability D) randomness
Answer: D

Learning Obj: LO 2.4: Describe how biases affect decision making.
Classification: Application

- 111) Whenever anyone praises Mark for his good performance, he has the tendency to attribute his success to his personal qualities such as his ability to thrive under pressure and his eye for detail. However, any negative performance feedback is always met with excuses such as unsupportive team members or insufficient time. This is an example of the ______.
- A) self-serving bias
- B) confirmation bias
- C) representation bias
- D) hindsight bias

Answer: A Diff: 2

AACSB: Application of knowledge

Learning Obj: LO 2.4: Describe how biases affect decision making.

Classification: Application

112) Marty had arranged for a high-profile speaker to deliver the keynote address at her college's annual function. However, due to unforeseen circumstances, the speaker was forced to drop out at the last moment. Marty reacts to this news by saying, "I knew all along that this would happen."

This is an example of the _____.

- A) anchoring effect
- B) availability bias
- C) self-serving bias
- D) hindsight bias

Answer: D Diff: 3

AACSB: Application of knowledge

Learning Obj: LO 2.4: Describe how biases affect decision making.

Classification: Application

113) The anchoring effect describes when decision makers fixate on initial information as a starting point and then, once set, fail to adequately adjust for subsequent information.

Answer: TRUE

Diff: 1

AACSB: Reflective thinking

Learning Obj: LO 2.4: Describe how biases affect decision making.

Classification: Concept

114) The availability bias describes the actions of decision makers who try to create meaning out of random events.

Answer: FALSE

Diff: 2

AACSB: Reflective thinking

Learning Obj: LO 2.4: Describe how biases affect decision making.

115) The sunk costs error occurs when decision makers forget that current choices cannot correct the past.

Answer: TRUE

Diff: 1

AACSB: Reflective thinking

Learning Obj: LO 2.4: Describe how biases affect decision making.

Classification: Concept

116) Explain any five decision biases or errors that managers make.

Answer:

Overconfidence bias: When decision makers tend to think they know more than they do or hold unrealistically positive views of themselves and their performance.

Immediate gratification bias: Decision makers tend to want immediate rewards and to avoid immediate costs.

Anchoring effect occurs when decision makers fixate on initial information as a starting point and then, once set, fail to adequately adjust for subsequent information. First impressions, ideas, prices, and estimates carry unwarranted weight relative to information received later.

Selective perception bias: When decision makers selectively organize and interpret events based on their biased perceptions.

Confirmation bias: Decision makers seek out information that reaffirms their past choices and discount information that contradicts past judgments. These people tend to accept at face value information that confirms their preconceived views and are critical and skeptical of information that challenges these views.

Framing bias: When decision makers select and highlight certain aspects of a situation while excluding others.

Availability bias: When decisions makers tend to remember events that are the most recent and vivid in their memory.

Representation bias: When decision makers assess the likelihood of an event based on how closely it resembles other events or sets of events.

Randomness bias: Decision makers try to create meaning out of random events.

Sunk costs error: When decision makers forget that current choices cannot correct the past.

Self-serving bias: Decision makers take credit for their successes and blame failure on outside factors.

Hindsight bias: The tendency for decision makers to falsely believe that they would have accurately predicted the outcome of an event once that outcome is actually known.

AACSB: Reflective thinking; Written and oral communication

Learning Obj: LO 2.4: Describe how biases affect decision making.

117) The decisions many managers make in today's business world typically involve A) little risk, complete information, and long decision timelines B) some risk, nearly complete information, and moderate timelines C) no risk, certainty of the outcomes, and time pressure D) risk, incomplete information, and time pressure Answer: D Diff: 2 AACSB: Reflective thinking Learning Obj: LO 2.5: Identify cutting-edge approaches for improving decision making. Classification: Concept
 118) A few decades ago, Walmart opened stores in Germany. After a few years, it closed all of them. The shopping habits of Europeans differed so much from that of Americans that the stores could not become profitable. What was Walmart's mistake? A) It did not understand cultural differences. B) It did not create standards for good decision making. C) It did not know when it was time to call it quits. D) It did not use an effective decision-making process. Answer: A Diff: 3 AACSB: Application of knowledge Learning Obj: LO 2.5: Identify cutting-edge approaches for improving decision making. Classification: Application
119) Design thinking suggests that managers should look at problem identification collaboratively and integratively with the goal of A) unveiling a rational approach to address the situation B) analyzing the situation with deductive reasoning C) developing solutions which somehow seem inevitable D) gaining a deep understanding of the situation Answer: D Diff: 3 AACSB: Reflective thinking Learning Obj: LO 2.5: Identify cutting-edge approaches for improving decision making. Classification: Concept
120) Very large complex data sets that are so huge that traditional software is unable to handle them are known as A) algorithm sets B) machine data C) deep data D) big data Answer: D Diff: 1 AACSB: Application of knowledge Learning Obj: LO 2.5: Identify cutting-edge approaches for improving decision making. Classification: Concept

121) is a method of data analysis that automates analytical model building. A) Deep learning B) Artificial intelligence building C) Machine learning D) Big data mining Answer: C Diff: 2 AACSB: Application of knowledge Learning Obj: LO 2.5: Identify cutting-edge approaches for improving decision making. Classification: Concept
Classification. Concept
122) involves the use of mathematics, statistics and other quantitative modeling methods. A) Analytics B) Intuitive decision making C) Psychological profiling D) Design thinking Answer: A Diff: 1
AACSB: Application of knowledge Learning Obj: LO 2.5: Identify cutting-edge approaches for improving decision making. Classification: Concept
123) Managers need to understand cultural differences to make effective decisions in today's fast-moving world. Answer: TRUE Diff: 1
AACSB: Reflective thinking Learning Obj: LO 2.5: Identify cutting-edge approaches for improving decision making. Classification: Concept

124) Design thinking is an interesting new line of thinking with broad implications for making effective business decisions by integrating emotional elements into the process.

Answer: TRUE

Diff: 2
